

Air Handling Unit

TAH Series

Capacity range: 600 CFM to 80000 CFM

- Eurovent certified, TAH series, double skin Air Handling Units.
 - Casing mechanical strength: D1
 - Casing leakage: L1/L2
 - Thermal transmittance: T2
 - Thermal bridge factor: TB2
 - Filter by-pass leakage: F9
- High efficiency aerofoil bladed backward curved plug fans, tested and certified by AMCA in accordance to AMCA 210 for air performance and AMCA 300 for sound performance.
 - EFF1, TEFC, IP55 degree of protection, Class F insulated, VFD compatible electric motors.
- AHRI certified cooling & heating coils in accordance with AHRI 410-91.
- Specially designed drain pan in stainless steel construction with all round edges, avoiding microbial growth as per ASHRAE 62-1999.
- UL certified filters selected for high dust-holding capacity and lower pressure drop.
- Specialized in constructing clean room units delivering optimum solution for hygiene and desired IAQ.
