

## Condensing Unit

TCD G Series

Capacity range: 14.0 kW to 87.0 kW

- New generation of condensing units with Ozone friendly refrigerant, R 407C
- Designed for ambient temperatures of upto 51.7 °C
- Quite and energy efficient hermetic scroll compressors
- High pressure safety cut-off with manual reset
- Metal fan shrouds and coil guards
- Space saving small foot print
- Tested in accordance with AHRI 365
- Suitable for wide range of electrical characteristics.
- Accessories like Filter drier, sight glass valves and control circuit
- Thermostatic expansion valve and Hot gas bypass kit as an option.
