

Electrostatic Precipitator

TEP Series

Capacity range: 2000 CFM TO 18000 CFM

- Fume and mist elimination efficiency: $\geq 95\%$,
- Low Amplitude Emission which is 100% permissible
- External control interface to facilitate linkage control and remote control
- Compact design with optimum efficiency
- Low pressure drop
- Safe, quite and environmental friendly
- Programmable Auto Wash function (optional)
- Fully automatic
- Low maintenance with auto-wash
- Modular Design meets various capacity requirements
- Patented cylindrical honeycomb structure filter cell, ensuring extremely high efficiency of fume and mist elimination.
- Multiple protection functions such as electrostatic discharge protection, power over-loading protection and transformer over heat protection, making it extremely safe and reliable.
